Software Development Degree

Scholarship for a 3 year degree

NEO NGWENYA

FRONT-END DEVELOPER

To whom may it concern,

I am a passionate developer who is looking for the perfect opportunity to enter into the developer world.

If you are looking for someone who will be responsible for creating clean, simple, and easy-to-use interfaces that users love, I am what you've been looking for. This is precisely what I love to do when creating a website. Most of my websites are responsive and not only do they work but they bring the user excitement, whether it be a small animation or the design itself. A huge example would be my website.

I am also someone who loves learning new things about coding as I have spent more than 900 hours refining my skill in the past two months. (certificates can be viewed in LinkedIn). Therefore, conducting research and finding ways of solving problems is something I have grown accustomed to doing. Also I love a challenge!

My portfolio website showcases my skill and other projects that I have worked on. (<https://neo-ngwenya.netlify.app/>) - PLEASE VIEW.

I would make a great addition to any team because I am passionate about Front-End development, I'm a very fast learner and a team-player. I enjoy working with others but most of all I enjoy completing a task especially if it was a challenging one, or one I have never done before.

If your company gives me an opportunity, you will not regret it.

Regards,
Neo Ngwenya
